

MID TERM EXAMINATION

Subject: computer networks

Paper: Mid Term Examination - Set B | Duration: 3 Hours | Max Marks: 20 | Date: 14-03-2026

Total Questions: 10 | Answer all questions.

Name: _____

Roll No: _____

Student Sign: _____

Teacher Sign: _____

SECTION A: MCQS

1. What are device-based controls primarily known as, according to the provided text? [2 Marks]
 - a) Output devices
 - b) Processing units
 - c) Input devices
 - d) Storage mechanisms

2. Which of the following is listed as a disadvantage of using a Trackball? [2 Marks]
 - a) It obscures the vision of the screen.
 - b) It requires additional desk space if mounted on a keyboard.
 - c) Its movement is indirect, in a plane different from the screen.
 - d) It has no direct relationship between hand and pointer movement.

3. According to the guidelines for Command Button labels, which of the following is recommended? [2 Marks]
 - a) Use single-word labels whenever possible.
 - b) Number labels consecutively for easy reference.
 - c) Use all uppercase letters for clarity.
 - d) Align the label to the left within the button borders.

4. Both Light Pens and Touch Screens offer direct movement in the same plane as the screen. However, what is a distinct advantage of a Light Pen over finger touching, as stated in the text? [2 Marks]
 - a) It is less fatiguing for extended use.
 - b) It requires no additional desk space.
 - c) It is more accurate than finger touching.
 - d) It prevents the hand from obscuring part of the screen.

5. Radio Buttons are described as being most useful for which type of data and choices? [2 Marks]
 - a) Commands that change frequently.
 - b) Mutually exclusive choices that are small and fixed in number.
 - c) Non-mutually exclusive options with unlimited choices.
 - d) Data that is best represented textually and is not frequently selected.

6. Which guideline is explicitly provided for the organization and location of toolbars? [2 Marks]
 - a) Main features and functions bars should be positioned vertically along the right side of the window.
 - b) Potentially destructive buttons must be integrated closely with frequently chosen selections.

- c) Users should be permitted to reconfigure the button organization.
- d) Subtask and sub-features bars should always be placed horizontally across the top.

7. What intent indicator should be included on a command button if it leads to a cascading dialog? [2 Marks]

- a) A double arrow (>>)
- b) A single arrow pointing at a related control
- c) An ellipsis (...)
- d) A triangle pointing in the direction the menu will appear

8. Which of the following is identified as a disadvantage of Voice control, making it challenging in certain environments? [2 Marks]

- a) It has a higher throughput than typing.
- b) It requires additional desk space.
- c) It is impractical to use in quiet environments.
- d) It prevents the user's hands from being occupied.

9. While both List Boxes and Drop-down/Pop-up List Boxes can handle an unlimited number of choices, under what specific condition does the text advise against using a drop-down list? [2 Marks]

- a) When screen space or layout considerations make radio buttons impractical.
- b) When the list content is expected to change frequently.
- c) If it is important that all options be seen together.
- d) When the data is best represented textually and not frequently selected.

10. The text describes both Keyboard and Mouse as device-based controls. For which specific task is the Keyboard explicitly stated as being "very useful for," where a mouse might typically be used for selection? [2 Marks]

- a) Providing "hot zones" around small objects.
- b) Pointing at moving targets.
- c) Entering and inserting text and alphanumeric data.
- d) Achieving a direct relationship between hand and pointer movement.
