

MID

Course: BTECH (123)

Set: A | Time: 2 Hours | Max Marks: 56 | Date: 15-03-2026

Name: _____

Roll No: _____

Student Sign: _____

Teacher Sign: _____

GENERAL INSTRUCTIONS:
HII

SECTION A: MCQs

1. Which quality component suggested by Nielsen (2003) measures how easy it is for users to accomplish basic tasks the first time they encounter a design? **[3 Marks]**

- a) Efficiency
- b) Memorability
- c) Learnability
- d) Satisfaction

2. According to the text, what is the average reading speed for English prose on a computer monitor? **[3 Marks]**

- a) 300 words per minute
- b) 200 words per minute
- c) 180 words per minute
- d) 250 words per minute

3. Which perceptual characteristic describes the tendency of our eyes and mind to see objects as belonging together if they share a common visual property like color or shape? **[3 Marks]**

- a) Proximity
- b) Similarity
- c) Closure
- d) Unity

4. Which of the following is categorized as a "physical" response to poor interface design rather than a psychological one? **[3 Marks]**

- a) Frustration
- b) Abandonment of the system
- c) Annoyance

d) Panic

5. What is the recommended type font size for older adults when using 4-inch wide columns? **[3 Marks]**

- a) 10-point type
- b) 12-point type
- c) 14-point type
- d) 18-point type

6. Which user group typically prefers ease of learning and remembering because their system use is an occasional or infrequent experience? **[3 Marks]**

- a) Expert users
- b) Mandatory users
- c) Discretionary users
- d) Power users

SECTION B: SHORT ANSWERS

7. How does the provided text define the term "usability" in terms of human performance? **[2 Marks]**

8. List three common pitfalls in the interface design process as identified in the text. **[2 Marks]**

9. Explain the difference between "Signals" and "Noise" in the context of human sensing mechanisms. **[2 Marks]**

10. According to Fitts' Law, what are the two primary factors that determine the time required to acquire a target? **[2 Marks]**

11. What is "habituation" and how does it affect sensory storage? **[2 Marks]**

SECTION C: LONG ANSWERS

12. Describe the five dimensions of usability as defined by Quesenbery (2003). **[4 Marks]**

13. Discuss the psychological responses that users may exhibit when encountering a poorly designed interface. **[4 Marks]**

14. Compare the characteristics of "Novice" and "Expert" users in terms of how they interact with a system. **[4 Marks]**

15. Explain the different components of human memory as described in the source text. **[4 Marks]**

16. Identify the actions or "design commandments" required to eliminate pitfalls in the design process. **[4 Marks]**

17. Describe the various techniques suggested by Gould (1988) for gaining an understanding of users and their work environment. **[4 Marks]**

18. Detail the physical and cognitive differences between young adults and older adults that affect computer use. **[4 Marks]**
