Course: DS (CS01)

Set: A | Time: 2 Hours | Max Marks: 50 | Date: 15-03-2026

Name: _____

Roll No: _____

Student Sign: _____

Teacher Sign: _____

GENERAL INSTRUCTIONS:
ALL

SECTION A: MCQs

1. Which of the following is NOT listed as a dimension of usability by Quesenbery (2003)? **[5 Marks]**

- a) Effective
- b) Efficient
- c) Learnability
- d) Engaging

2. What concept does Fitts' Law (1954) primarily address in screen design, according to the provided text? **[5 Marks]**

- a) The time to acquire a target is a function of its distance and size.
- b) The importance of visual acuity in distinguishing details.
- c) The process of encoding information into long-term memory.
- d) The impact of cognitive style on problem-solving.

3. According to the text, which of the following is a characteristic typically associated with expert users, as opposed to novice users? **[5 Marks]**

- a) They depend on system features that assist recognition memory.
- b) They need restricted vocabularies and simple tasks.
- c) They seek efficiency by bypassing novice memory aids and reducing keystrokes.
- d) They view practice as an aid to moving up to expert status.

4. Which of these is explicitly stated as one of Mandel's (1994) 10 most common usability problems in graphical systems? **[5 Marks]**

- a) Visual clutter
- b) Confusing navigation
- c) Inadequate feedback and confirmation
- d) Stale design caused by emulation of printed documents

5. What is a common general characteristic of a discretionary user?

[5 Marks]

- a) They require the computer to perform tasks that cannot be performed in any other way.
- b) They willingly invest time and effort in learning to use the computer.
- c) Technical details are of no interest to them.
- d) They often possess a technical background.

SECTION B: SHORT ANSWERS

6. According to Gould (1988), what are the general observations about design concerning the development process? [5 Marks]

7. List and briefly describe Nielsen's (2003) five quality components of usability. [5 Marks]

8. Describe the typical psychological responses to poor design and explain how these responses diminish user effectiveness. [5 Marks]

9. Explain the distinction between long-term and short-term (working) memory as described in the text, and identify an important memory consideration for interface design. [5 Marks]

10. According to the text, what are the common pitfalls in the design process that stem from a flawed design process? [5 Marks]

--- End of Question Paper ---
