

MID-TERM EXAMINATION

Subject: python

Paper: Set A | Duration: 30 Minutes | Max Marks: 50 | Date: 22-02-2026

Total Questions: 1 | Answer all questions.

Section 1: MCQ (1 Questions - 1 Marks)

Q1. [1 marks] (Hard)

Consider the following Python code snippet:

```
class Parent:
    def __init__(self, val_p):
        self.val_p = val_p

class Child(Parent):
    __slots__ = ('val_c',)

    def __init__(self, val_p, val_c):
        super().__init__(val_p)
        self.val_c = val_c

instance = Child(1, 2)
```

Which of the following statements about instance is true?

- A) instance will have a `__dict__` attribute, containing `{'val_p': 1}`.
- B) instance will not have a `__dict__` attribute, and attempts to access it will raise an `AttributeError`.
- C) instance will have a `__dict__` attribute, containing `{'val_c': 2}`.
- D) instance will have a `__dict__` attribute, but it will be empty.
