

# MID TERM EXAMINATION

Paper: Mid Term Examination - Set A | Duration: 3 Hours | Max Marks: 128 | Date: 14-03-2026

---

Total Questions: 17 | Answer all questions.

Name: \_\_\_\_\_

Roll No: \_\_\_\_\_

Student Sign: \_\_\_\_\_

Teacher Sign: \_\_\_\_\_

---

## SECTION A: MCQS

1. Which of the following is NOT explicitly mentioned as a type of scenario for architectural evaluation? [3 Marks]
  - a) Use-case scenarios
  - b) Growth scenarios
  - c) Performance scenarios
  - d) Exploratory scenarios
  
2. Which factor directly implies that the system design must adapt to the component's existing functionality? [3 Marks]
  - a) Faster development
  - b) Limited customization
  - c) Architecture must adjust to the component
  - d) Vendor dependency
  
3. In architectural design decision-making, which of the following is an example of a Non-Functional Requirement (Quality Attribute)? [3 Marks]
  - a) Inventory management
  - b) Product search
  - c) Scalability
  - d) Payments

## SECTION A: SHORT ANSWERS

4. For a successful evaluation of architecture, what must be clearly defined and measurable? Provide an example from the text. [6 Marks]
  
5. List three essential items that complete, accurate, and up-to-date architecture documentation should include. [6 Marks]
  
6. Explain what "Extra integration work" entails as an impact of using off-the-shelf components. [6 Marks]
  
7. What does "Vendor dependency" imply when an off-the-shelf component is used in an architecture? [6 Marks]
  
8. According to the text, what are "Risks" and "Sensitivity points" in the context of architectural evaluation? [6 Marks]
  
9. Name three key stakeholders whose involvement is required for successful architectural evaluation. [6 Marks]

**10.** Briefly describe what "Reusability and Extensibility" refers to as a factor in design decision-making. **[6 Marks]**

## **SECTION A: LONG ANSWERS**

**11.** Discuss the three types of scenarios important for architectural evaluation and explain the purpose of each. **[11 Marks]**

**12.** Explain the importance of an "Experienced Evaluation Team" in the successful evaluation of architecture. What specific areas of understanding should such a team possess? **[11 Marks]**

**13.** Analyze the implications of "Limited customization" and "Hard to replace later" as impacts of using off-the-shelf components in software architecture. **[11 Marks]**

**14.** Discuss how using off-the-shelf components can lead to both "Faster development" and "Extra integration work," providing an example for each from the text. **[11 Marks]**

**15.** Elaborate on the distinct roles of "Functional Requirements" and "Non-Functional Requirements" (Quality Attributes) in guiding design decisions in software architecture. **[11 Marks]**

**16.** Discuss how "Budget and Schedule" and "Team Skills and Experience" influence architectural design decisions, providing specific examples from the text for each. **[11 Marks]**

**17.** Compare and contrast "Structured Evaluation Methods" and "Proper Tools and Techniques" as factors for the successful evaluation of architecture. **[11 Marks]**
